

MANDEEP SANDHU

An aspiring software engineer with deep interests in software engineering, embedded, IoT and robotic systems. Passionate about Computer Science with knowledge in artificial intelligence and machine learning. Pride myself on ability to commit to learning difficult skills, tools and concepts. Aptitude for working autonomously or within a team. Determined to achieve outstanding results and delivering innovative and effective solutions. Have excelled in challenging endeavours outside of academia to develop a rounded and success-oriented character that will encourage development and achievement of long-term goals. Hold an overarching career aim of becoming a software professional.

Website

Soft skills

- Teamwork & Communication
- Planning and Organisation
- Problem-solving & Time-management

Languages

Knowledge

Supplementary

The Duke of Edinburgh's
Bronze & Silver Awards

Play the guitar 10+ years

Brown Belt in Judo

Qualifications

THE UNIVERSITY
of EDINBURGH

2017 – 2018

M.Sc. Computer Science

Brunel
University
London

2012 – 2016

B.Sc. Computer Science and
Artificial Intelligence First-class

Projects

2018 City Street Exploration (MSc Dissertation)

An efficient and novel routing algorithm for interest-based city street exploration

2018 Deep Learning

A Deep Learning project to classify music genres embedded in the data using Deep Neural Networks

[Course list](#)

2018 IoT Indoor Localisation

IoT system utilising Bluetooth beacons for indoor localisation

2017 IoT Step Tracker

IoT step tracking device interfaced to Android application that predicts steps using Machine Learning

2017 Planetary Rover Robot

Full-stack planetary rover based robot developed to sense, autonomously navigate and complete assigned tasks

2016 Neuro-evolution (BSc Dissertation)

Training neural networks using evolutionary algorithms

Career Target

Software Engineer
